ELEVATOR PITCH

Rent and utility bills as well as groceries have to be shared by people living together in one home. However, it often gets very confusing trying to keep track of who paid what and who still owes money. The new app now keeps all shared expenses in one place. Users can then choose who is supposed to pay for what. They can always look at the updated balances and also note when payment has been made.

Feature that separates it from other applications: Be informative/resource on expenses and financial vocabulary

Goals sector?

SOLUTION STATEMENT

A mobile friendly app that help roomates record shared expenses, calculate each members shared expenses and track outstanding balances.

CURRENT PROCESS FLOW

DELIVERABLES PLACEHOLDER SLIDE

Development Tools

Major Functional Components

Risks

Appendix

- Real World Product vs Prototype Table

WHAT IT WILL DO

- Create a household group and invite members.
- Record bills with payer, total, and member sharing cost.
- Custom Splitting Expenses
- Custom Variable Expenses (Expected vs Actual)
 - Allows the input of “variable income” to determine expense expectation by next paycheck?
- Itemizes receipts
- Show balances
- Records payments
- Send reminders for upcoming bills/subscriptions
- Indicator/reminder for individuals who has not paid for a specific expense

WHAT IT WILL NOT DO

It wont pay your bills for you. (Won't automatically receive bills)

Force someone to pay.

No in app payments/No payment method connected.

- Banking information will not be stored
- Will not facilitate transactions between users

Manage nor teach people their Personal Finances

Manage Investments

Cook for you (this is household expenses not household chores)

COMPETITION MATRIX

Functionality	Team Sapphire	Splitwise	Tricount	
Create shared groups	✓			
Invite household members	✓			
Record shared bills	✓			
Custom splitting expenses	✓			
Show balances	✓			
Record payments	✓			
Send reminders	✓			
Indicators for those who have not paid	✓			
Financial Vocab/Tooltips	✓			
Scan receipts	✓			

RISKS

- 1.) Customer and End User:Lawsuits
- 2.) Technical:Lawsuits
- 3.) Security:Lawsuits
- 4.) Legal:Lawsuits
